SERVICES

Roof Condition Survey -

AWS can show you how to get the maximum life from your existing roof system. We will show you the options and budgets necessary for repair, restoration or replacement.

Of course if the existing roof is beyond repair and requires replacement, we can help you obtain the best roof system at the best cost for Maximum Value.

Design -

The integration of the roofing structure, roof covering and Solar system is critical to the trouble-free, long term performance of building and its components. AWS provides detailed specifications for your new Solar Power Plant and its attachment to the building making sure the contractor gets it right.

Quality Assurance -

It is important that you have a set of eyes watching the installation. Our company will provide you with on site installation observation of the roof penetrations to verify they are in compliance with the design specifications.

Project Management -

Solar PV, Roofing, Waterproofing
